ARG10674 anti-IGFBP2 antibody

Package: 50 μg Store at: -20°C

Summary

Product Description Rabbit Polyclonal antibody recognizes IGFBP2

Tested Reactivity Hu, Rat

Tested Application WB

Host Rabbit

Clonality Polyclonal

Isotype IgG

Target Name IGFBP2
Species Human

Immunogen Synthetic peptide corresponding to the sequence at a.a 228-257

(QQELDQVLERISTMRLPDERGPLEHLYSLH) around the C-terminus of human IGFBP2 protein.

Conjugation Un-conjugated

Alternate Names IBP2; IGF-BP53; IGF-binding protein 2; IGFBP-2

Application Instructions

Application table	Application	Dilution
	WB	0.1 - 0.5 μg/ml
Application Note	* The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.	

Properties

Form Liquid

Purification Affinity purification with immunogen.

Buffer 1X PBS, 0.025% Sodium azide and 2.6% BSA

Preservative 0.026% Sodium azide

Stabilizer 2.6% BSA

Concentration 0.5 mg/ml

Storage instruction For continuous use, store undiluted antibody at 2-8°C for up to a week. For long-term storage, aliquot

and store at -20°C or below. Storage in frost free freezers is not recommended. Avoid repeated freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be gently mixed

before use.

Note For laboratory research only, not for drug, diagnostic or other use.

GeneID: 3485 Human

Swiss-port # P12843 Rat

Swiss-port # P18065 Human

Gene Symbol IGFBP2

Gene Full Name Insulin Like Growth Factor Binding Protein 2

Background The protein encoded by this gene is one of six similar proteins that bind insulin-like growth factors I and

II (IGF-I and IGF-II). The encoded protein can be secreted into the bloodstream, where it binds IGF-I and IGF-II with high affinity, or it can remain intracellular, interacting with many different ligands. High expression levels of this protein promote the growth of several types of tumors and may be predictive of the chances of recovery of the patient. Several transcript variants, one encoding a secreted isoform and the others encoding nonsecreted isoforms, have been found for this gene. [provided by RefSeq,

Sep 2015]

Function Inhibits IGF-mediated growth and developmental rates. IGF-binding proteins prolong the half-life of the

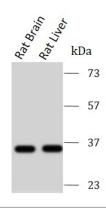

IGFs and have been shown to either inhibit or stimulate the growth promoting effects of the IGFs on

cell culture. They alter the interaction of IGFs with their cell surface receptors. [UniProt]

Calculated Mw 35 kDa

PTM O-glycosylated.
