ARG20531
anti-BiP / GRP78 antibody

Summary

Product Description: Rabbit Polyclonal antibody recognizes BiP / GRP78
Tested Reactivity: Hu, Ms, Rat, Bov, Dog, Fungi, Hm, Mk, Rb, Xenopus laevis
Predict Reactivity: Bov, Hm, Mk, Rb, Xenopus
Tested Application: ICC/IF, IHC-P, IP, WB
Host: Rabbit
Clonality: Polyclonal
Target Name: BiP / GRP78
Antigen Species: Rat
Immunogen: KLH-conjugated synthetic peptide of Rat BiP / GRP78.
Conjugation: Un-conjugated
Alternate Names: Heat shock 70 kDa protein 5; BiP; GRP-78; Endoplasmic reticulum lumenal Ca; MIF2; 78 kDa glucose-regulated protein; GRP78; Immunoglobulin heavy chain-binding protein; HEL-S-89n; BIP; 2+

Application Instructions

Application Note: * The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.

Properties

Form: Liquid
Purification: Affinity purification with immunogen.
Buffer: Rabbit antiserum.
Storage instruction: For continuous use, store undiluted antibody at 2-8°C for up to a week. For long-term storage, aliquot and store at -20°C or below. Storage in frost free freezers is not recommended. Avoid repeated freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be gently mixed before use.
Note: For laboratory research only, not for drug, diagnostic or other use.
Bioinformation

Gene Symbol: Hspa5
Gene Full Name: heat shock protein 5

Background: The protein encoded by this gene is a member of the heat shock protein 70 (HSP70) family. It is localized in the lumen of the endoplasmic reticulum (ER), and is involved in the folding and assembly of proteins in the ER. As this protein interacts with many ER proteins, it may play a key role in monitoring protein transport through the cell.[provided by RefSeq, Sep 2010]

Function: Probably plays a role in facilitating the assembly of multimeric protein complexes inside the endoplasmic reticulum. Involved in the correct folding of proteins and degradation of misfolded proteins via its interaction with DNAJC10, probably to facilitate the release of DNAJC10 from its substrate (By similarity). [UniProt]

ARG20531 anti-BiP / GRP78 antibody ICC/IF image

Immunofluorescence: Heat Shocked (42°C for 30 min) HeLa cells. Fixation: 2% Formaldehyde for 20 min at RT. Primary Antibody: ARG20531 anti-BiP / GRP78 antibody at 1:100 for 12 hours at 4°C. Secondary Antibody: FITC Goat anti-Rabbit (green) at 1:200 for 2 hours at RT. Counterstain: DAPI (blue) nuclear stain at 1:40000 for 2 hours at RT. Magnification: 100x. Left: DAPI (blue) nuclear stain. Middle: ARG20531 anti-BiP / GRP78 antibody. Right: Composite.

ARG20531 anti-BiP / GRP78 antibody IHC image

Immunohistochemistry: formaldehyde-fixed paraffin embedded sections of Mouse hippocampal tissue stained with ARG20531 anti-BiP / GRP78 antibody at 1:100 dilution. Tissue was counterstained using DAPI at a 1:1000 dilution in order to visualize the nuclei in the pyramidal cell layer. Images courtesy of Rachel Reith, NIH/NIMH.
