

ARG22142
anti-ChT1 antibody [CT1]Package: 250 µg
Store at: -20°C

Summary

Product Description	Mouse Monoclonal antibody [CT1] recognizes ChT1
Tested Reactivity	Chk
Tested Application	FACS, IP
Specificity	Chicken/Quail ChT1
Host	Mouse
Clonality	Monoclonal
Clone	CT1
Isotype	IgG1, kappa
Target Name	ChT1
Antigen Species	Chicken
Immunogen	Chicken thymocytes
Conjugation	Un-conjugated
Alternate Names	V-set and immunoglobulin domain-containing protein 1; Cell surface A33 antigen; Glycoprotein A34; 1700062D20Rik; GPA34; dJ889N15.1

Application Instructions

Application table	Application	Dilution
	FACS	< 1 µg/10 ⁶ cells
	IP	Assay-dependent
Application Note	* The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.	
Calculated Mw	42 kDa	

Properties

Form	Liquid
Buffer	BBS (pH 8.2)
Concentration	0.5 mg/ml
Storage instruction	For continuous use, store undiluted antibody at 2-8°C for up to a week. For long-term storage, aliquot and store at -20°C. Storage in frost free freezers is not recommended. Avoid repeated freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be gently mixed before use.
Note	For laboratory research only, not for drug, diagnostic or other use.

Gene Symbol

VSIG1

Gene Full Name

V-set and immunoglobulin domain containing 1

Background

This gene encodes a member of the junctional adhesion molecule (JAM) family. The encoded protein contains multiple glycosylation sites at the N-terminal region, and multiple phosphorylation sites and glutamic acid/proline (EP) repeats at the C-terminal region. The gene is expressed in normal stomach and testis, as well as in gastric, esophageal and ovarian cancers. Alternatively spliced transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Dec 2009]
