ARG44500 anti-HDHD5 antibody

Package: 50 μg Store at: -20°C

Summary

Product Description Rabbit Polyclonal antibody recognizes HDHD5

Tested Reactivity Hu, Ms, Rat

Tested Application FACS, IHC-P, WB

Host Rabbit

Clonality Polyclonal

Isotype IgG

Target Name HDHD5

Species Human

Immunogen Human HDHD5 recombinant protein

Conjugation Un-conjugated

Alternate Names HDHD5; Haloacid Dehalogenase Like Hydrolase Domain Containing 5; CECR5; Haloacid Dehalogenase-

Like Hydrolase Domain-Containing 5; Cat Eye Syndrome Chromosome Region, Candidate 5; Cat Eye

Syndrome Critical Region Protein 5

Application Instructions

Application table	Application	Dilution
	FACS	1-3 μg/10^6 cells
	IHC-P	2-5 μg/ml
	WB	0.25-0.5 μg/ml
Application Note	The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.	

Properties

Form Liquid

Purification Affinity purified with Immunogen.

Buffer 0.9% NaCl, 0.2% Na2HPO4, 0.05% Sodium azide and 4% Trehalose.

Preservative 0.05% Sodium azide

Stabilizer 4% Trehalose

Concentration 0.5 mg/ml

Storage instruction For continuous use, store undiluted antibody at 2-8°C for up to a week. For long-term storage, aliquot

and store at -20°C or below. Storage in frost free freezers is not recommended. Avoid repeated freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be gently mixed

before use.

Bioinformation

Gene Symbol HDHD5

Gene Full Name Haloacid Dehalogenase Like Hydrolase Domain Containing 5

Background Predicted to be involved in glycerophospholipid biosynthetic process. Predicted to be active in

mitochondrion.

Function Candidate gene for the Cat Eye Syndrome (CES), a developmental disorder associated with the

duplication of a 2 Mb region of 22q11.2. Duplication usually takes in the form of a surpernumerary bisatellited isodicentric chromosome, resulting in four copies of the region (represents an inv dup22(q11)). CES is characterized clinically by the combination of coloboma of the iris and anal atresia with fistula, downslanting palpebral fissures, preauricular tags and/or pits, frequent occurrence of heart

and renal malformations, and normal or near-normal mental development.

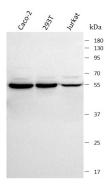

Calculated Mw 46 kDa
