

**ARG57573**  
**anti-RRAS2 / TC21 antibody [EM-50] (PE)**Package: 50 µg  
Store at: 4°C

### Summary

Product Description	PE-conjugated Mouse Monoclonal antibody [EM-50] recognizes RRAS2 / TC21
Tested Reactivity	Hu
Tested Application	FACS
Specificity	The antibody recognizes RRAS2 / TC21 protein and does not react with RRAS1, H-Ras, K-Ras, and N-Ras.
Host	Mouse
Clonality	Monoclonal
Clone	EM-50
Isotype	IgG1
Target Name	RRAS2 / TC21
Species	Human
Immunogen	Human TC21.
Conjugation	PE
Alternate Names	TC21; Teratocarcinoma oncogene; Ras-related protein R-Ras2; Ras-like protein TC21

### Application Instructions

Application table	Application	Dilution
	FACS	1 - 4 µg/ml
Application Note	* The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.	

### Properties

Form	Liquid
Purification	Purified.
Buffer	PBS and 15mM Sodium azide.
Preservative	15mM Sodium azide
Concentration	0.1 mg/ml
Storage instruction	Aliquot and store in the dark at 2-8°C. Keep protected from prolonged exposure to light. Avoid repeated freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be gently mixed before use.
Note	For laboratory research only, not for drug, diagnostic or other use.

Bioinformation

Gene Symbol	RRAS2
Gene Full Name	RRAS2
Background	This gene encodes a member of the R-Ras subfamily of Ras-like small GTPases. The encoded protein associates with the plasma membrane and may function as a signal transducer. This protein may play an important role in activating signal transduction pathways that control cell proliferation. Mutations in this gene are associated with the growth of certain tumors. Pseudogenes of this gene are found on chromosomes 1 and 2. Alternate splicing results in multiple transcript variants. [provided by RefSeq, Apr 2010]
Function	It is a plasma membrane-associated GTP-binding protein with GTPase activity. Might transduce growth inhibitory signals across the cell membrane, exerting its effect through an effector shared with the Ras proteins but in an antagonistic fashion. [UniProt]
Calculated Mw	23 kDa
PTM	May be post-translationally modified by both palmitoylation and polyisoprenylation. [UniProt]
