ARG59097 anti-StAR antibody

Package: 100 μl Store at: -20°C

Summary

Product Description Rabbit Polyclonal antibody recognizes StAR

Tested Reactivity Hu, Ms, Rat

Tested Application ICC/IF, WB

Host Rabbit

Clonality Polyclonal

Isotype IgG
Target Name StAR

Species Human

Immunogen Recombinant protein of Human StAR.

Conjugation Un-conjugated

Alternate Names START domain-containing protein 1; Steroidogenic acute regulatory protein, mitochondrial; STARD1;

StAR; StARD1

Application Instructions

Application table	Application	Dilution
	ICC/IF	1:50 - 1:200
	WB	1:500 - 1:2000
Application Note	* The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.	
Positive Control	Mouse ovary	
Observed Size	28kDa	

Properties

Form Liquid

Purification Affinity purified.

Buffer PBS (pH 7.3), 0.02% Sodium azide and 50% Glycerol.

Preservative 0.02% Sodium azide

Stabilizer 50% Glycerol

Storage instruction For continuous use, store undiluted antibody at 2-8°C for up to a week. For long-term storage, aliquot

and store at -20°C. Storage in frost free freezers is not recommended. Avoid repeated freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be gently mixed before use.

Note For laboratory research only, not for drug, diagnostic or other use.

Bioinformation

Gene Symbol STAR

Gene Full Name steroidogenic acute regulatory protein

Background The protein encoded by this gene plays a key role in the acute regulation of steroid hormone synthesis

by enhancing the conversion of cholesterol into pregnenolone. This protein permits the cleavage of cholesterol into pregnenolone by mediating the transport of cholesterol from the outer mitochondrial membrane to the inner mitochondrial membrane. Mutations in this gene are a cause of congenital lipoid adrenal hyperplasia (CLAH), also called lipoid CAH. A pseudogene of this gene is located on

chromosome 13. [provided by RefSeq, Jul 2008]

Function Plays a key role in steroid hormone synthesis by enhancing the metabolism of cholesterol into

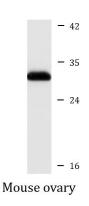

pregnenolone. Mediates the transfer of cholesterol from the outer mitochondrial membrane to the

inner mitochondrial membrane where it is cleaved to pregnenolone. [UniProt]

Calculated Mw 32 kDa

Cellular Localization Mitochondrion. [UniProt]
