ARG70057 Human IL13 recombinant protein (Active) (His-tagged, C-ter) Package: 100 μg, 20 μg

Store at: -20°C

## Summary

Product Description E. coli expressed, His-tagged (C-ter) Active Human IL13 recombinant protein

Tested Application SDS-PAGE

Target Name IL13

Species Human

A.A. Sequence Gly35 - Asn146

Expression System E. coli

Activity Active

Alternate Names Interleukin-13; P600; IL-13

## **Properties**

Form Powder

Purification Note Endotoxin level is < 0.01 EU/µg of the protein, as determined by the LAL test.

Purity > 95% (by SDS-PAGE)

Buffer PBS (pH 8.0)

Reconstitution It is recommended to reconstitute the lyophilized protein in sterile water to a concentration not less

than 200 µg/mL and incubate the stock solution for at least 20 min at room temperature to make sure

the protein is dissolved completely.

Storage instruction For long term, lyophilized protein should be stored at -20°C or -80°C. After reconstitution, aliquot and

store at -20°C or -80°C for up to one month. Storage in frost free freezers is not recommended. Avoid

repeated freeze/thaw cycles. Suggest spin the vial prior to opening.

Note For laboratory research only, not for drug, diagnostic or other use.

## Bioinformation

Gene Symbol IL13

Gene Full Name interleukin 13

Background This gene encodes an immunoregulatory cytokine produced primarily by activated Th2 cells. This

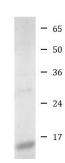

cytokine is involved in several stages of B-cell maturation and differentiation. It up-regulates CD23 and MHC class II expression, and promotes IgE isotype switching of B cells. This cytokine down-regulates macrophage activity, thereby inhibits the production of pro-inflammatory cytokines and chemokines. This cytokine is found to be critical to the pathogenesis of allergen-induced asthma but operates through mechanisms independent of IgE and eosinophils. This gene, IL3, IL5, IL4, and CSF2 form a cytokine gene cluster on chromosome 5q, with this gene particularly close to IL4. [provided by RefSeq,

Jul 20081

Function Cytokine. Inhibits inflammatory cytokine production. Synergizes with IL2 in regulating interferon-

gamma synthesis. May be critical in regulating inflammatory and immune responses. [UniProt]

Cellular Localization Secreted. [UniProt]
