ARG70199
Mouse CNTF recombinant protein (Active) (His-tagged, C-ter)

Package: 100 μ g, 20 μ g

Store at: -20°C

Summary

Product Description E. coli expressed, His-tagged (C-ter) Active Mouse CNTF recombinant protein

Tested Application SDS-PAGE

Target Name CNTF

Species Mouse

A.A. Sequence Met1 - Met198

Expression System E. coli

Activity Active

Alternate Names HCNTF; CNTF; Ciliary neurotrophic factor

Properties

Form Powder

Purification Note Endotoxin level is less than 0.1 EU/μg of the protein, as determined by the LAL test.

Purity > 98% (by SDS-PAGE)

Buffer PBS (pH 7.4)

Reconstitution It is recommended to reconstitute the lyophilized protein in sterile water to a concentration not less

than 200 µg/mL and incubate the stock solution for at least 20 min at room temperature to make sure

the protein is dissolved completely.

Storage instruction For long term, lyophilized protein should be stored at -20°C or -80°C. After reconstitution, aliquot and

store at -20°C or -80°C for up to one month. Storage in frost free freezers is not recommended. Avoid

repeated freeze/thaw cycles. Suggest spin the vial prior to opening.

Note For laboratory research only, not for drug, diagnostic or other use.

Bioinformation

Gene Symbol CNTF

Gene Full Name ciliary neurotrophic factor

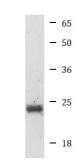

Background The protein encoded by this gene is a polypeptide hormone whose actions appear to be restricted to

the nervous system where it promotes neurotransmitter synthesis and neurite outgrowth in certain neuronal populations. The protein is a potent survival factor for neurons and oligodendrocytes and may be relevant in reducing tissue destruction during inflammatory attacks. A mutation in this gene, which results in aberrant splicing, leads to ciliary neurotrophic factor deficiency, but this phenotype is not causally related to neurologic disease. A read-through transcript variant composed of the upstream ZFP91 gene and CNTF sequence has been identified, but it is thought to be non-coding. Read-through transcription of ZFP91 and CNTF has also been observed in mouse. [provided by RefSeq, Oct 2010]

Function CNTF is a survival factor for various neuronal cell types. Seems to prevent the degeneration of motor

axons after axotomy. [UniProt]

Cellular Localization Cytoplasm. [UniProt]
