ARG83008 Rat IL18 ELISA Kit Package: 96 wells Store at: 4°C

### **Summary**

Product Description ARG83008 Rat IL18 ELISA Kit is an Enzyme Immunoassay kit for the quantification of Rat IL18 in serum,

plasma (heparin), ascites, urine and cell culture supernatants.

Tested Reactivity Rat

Tested Application ELISA

Target Name IL18

Conjugation HRP

Conjugation Note Substrate: TMB and read at 450 nm.

Sensitivity 15.6 pg/ml

Sample Type Serum, plasma (heparin), ascites, urine and cell culture supernatants.

Standard Range 31.25 - 2000 pg/ml

Sample Volume  $100 \mu l$ 

Precision Intra-Assay CV: less than 10%

Inter-Assay CV: less than 10%

Alternate Names IL18, Interleukin 18, IL1F4, IL 18, IGIF, IL 1g, Interleukin 18 (Interferon-Gamma-Inducing Factor), IFN

Gamma Inducing Factor, Interleukin 1 Gamma, Interleukin 18, Iboctadekin, IL 1 Gamma, Interferon

Gamma Inducing Factor, Interferon Gamma Inducing Factor

# **Application Instructions**

Assay Time ~ 4 hours

#### **Properties**

Form 96 well

Storage instruction Store the kit at 2-8°C. Keep microplate wells sealed in a dry bag with desiccants. Do not expose test

reagents to heat, sun or strong light during storage and usage. Please refer to the product user manual

for detail temperatures of the components.

Note For laboratory research only, not for drug, diagnostic or other use.

#### Bioinformation

Gene Symbol IL18

Gene Full Name Interleukin 18

Background The protein encoded by this gene is a proinflammatory cytokine of the IL-1 family that is constitutively

found as a precursor within the cytoplasm of a variety of cells including macrophages and

keratinocytes. The inactive IL-18 precursor is processed to its active form by caspase-1, and is capable of stimulating interferon gamma production, and of regulating both T helper (Th) 1 and Th2 responses. This cytokine has been implicated in the injury of different organs, and in potentially fatal conditions

www.arigobio.com arigo.nuts about antibodies 1/2

characterized by a cytokine storm. In humans, IL-18 gene is located on chromosome 11. Alternatively spliced transcript variants encoding different isoforms have been found for this gene.[provided by

RefSeq, Aug 2020]

Function Pro-inflammatory cytokine primarily involved in epithelial barrier repair, polarized T-helper 1 (Th1) cell

and natural killer (NK) cell immune responses. Upon binding to IL18R1 and IL18RAP, forms a signaling ternary complex which activates NF-kappa-B, triggering synthesis of inflammatory mediators. [UniProt]
